Dear Fujita,

Thank you for the information!

As the Call for Papers will open tomorrow, we have decided to publish your session as preliminary version with the note that the description will follow soon. Please send us the revised version as soon as possible to caa2026@caaconference.org.

Many thanks and best,
Anja

Dear Eythan Levy,
Chair, CAA Scientific Committee

Sorry for my late reply as we had field laser and optical scanning of decorated dolmens in Portugal until last Thursday.

I am still in a meeting in Indonesia, and fly back home day after tomorrow.

I will work on the revised proposal after return home, but it takes some time, as we are in the last stage of governmental research fund supports.

Best regards

Fujita Haruhiro, Professor, Ph.D.,

件名: CAA 2026 Session review

eythan.levy@gmail.com からメールを受け取る頻度は高くありません。これが重要な理由
<<https://aka.ms/LearnAboutSenderIdentification>>

Dear Colleagues,

Your session “Reframing Cultural Properties Rather than as “Relics of the Past” but as “Objects that Stimulate Modern People's Perception, Sensibility, and Meaning-Making” has been accepted with major revisions for the CAA2026 conference, held in person in Vienna on March 31st - April 4th 2026.

Please take note of the following reviewer comments when updating your abstract:
“This doesn't seem to be a session proposal but more a project presentation. The abstract is too long, with no call for paper or discussion, only presenting the authors project in length. This seems to be confirmed by the format description where the authors state that there will be a demonstration and one presentation of 20 min (or there is a typo and researcher is supposed to be plural). Moreover, the abstract lacks clarity, especially when speaking about adding "components and specialists as founders". Are they speaking about the session or their own project? Finally, there are no real research questions that would allow other researchers to connect to this session. Also, just as a note, when citing a PCI paper, it is better to refer to the PCI recommandation rather than the Zenodo repository.”

Please submit your updated abstract via the following link, using the password CAA2026Vienna, at the latest on Saturday 13 September (apologies for the short delay):

<https://2026.caaconference.org/submit-a-session-proposal/>

We are aware that a full reframing of the session is impossible within such short notice. I therefore invite you to revise your abstract according to the main points raised by the

reviewer: (1) shortening (and clarifying) the abstract, (2) making clear whether your session invites paper submissions or not, (3) highlighting research questions.

We encourage you to help promote your session and the conference via your networks and on social media, and to encourage colleagues to submit a paper or poster. The call for papers is currently scheduled to open on the 15th of September. The conference website where information will be available is at: <https://2026.caaconference.org/>.

At this time, we wish to highlight a few points about the CAA paper review process this year.

1) All paper abstracts submitted to the CAA are reviewed by members of the Review College. Paper abstracts are assessed on the basis of scientific merit. Authors are required to agree to the CAAs ethics policy on submission. If there are concerns that a paper and the research it represents may violate the CAA ethics policy, the abstract should be brought to the attention of the Scientific Committee and the Ethics Committee.

2) A member of the CAA Scientific Committee, Lizzie Scholtus (lizzie.scholtus@gmail.com<mailto:lizzie.scholtus@gmail.com>), has been assigned to your session to provide guidance, ensure that the paper review process is progressing in a timely manner, to resolve any disagreements among reviewers, and to respond to any queries. This person will be your first point of contact for anything related to the review of papers and scientific content of your session. Please work with them closely to ensure the process goes as smoothly as possible.

3) As session directors, you will be actively involved in the review of papers in your session. Specifically, it will be your responsibility to identify reviewers with relevant expertise and assign paper submissions to them for review. You know your topic best and are therefore best placed to select suitable reviewers. You need ideally at least 6 papers for the session. In case of a lower number of submitted papers to your session, we will assess the situation together once all the papers have been submitted.

4) As part of the process for CAA proceedings, we kindly ask that you register with PCI Archaeology as recommenders before January 31st via this link:

<https://archaeo.peercommunityin.org>. This ensures that authors who wish to submit papers to the proceedings can find their respective sessions easily. The CAA proceedings follow the PCI process https://archaeo.peercommunityin.org/help/guide_for_authors, which streamlines peer review, allows papers to be held as preprints, and reduces publication time. Please remember that as session chairs, you will be responsible for managing the submitted papers. We are looking forward to working with you over the coming months to bring together a successful conference.

Please don't hesitate to contact me with any questions.

Best wishes,

Eythan Levy

Chair, CAA Scientific Committee
